

## EFFICACY OF CURB/ SCOOT AS A FOX REPELLENT

Foxolutions have been using Curb as a fox repellent for a number of clients with a very high degree of success.

### **CASE STUDIES**

#### Charlton Athletic Football Club

Charlton Athletic have had a history of damage to their football pitch caused by foxes digging, fouling and scent marking. They had previously employed a company to trap foxes but had experienced negative publicity and as a result had encountered problems with animal welfare groups. The problem is a major health and safety issue as it would be easy for a player to cause themselves an injury by turning an ankle in one of the many divots caused by the foxes.

Foxolutions provide a humane way to preserve the pitch by spraying a 2 metre wide band around the perimeter with a solution of Curb applied by backpack sprayer on a fortnightly basis. This has significantly reduced the problem. When Charlton were relegated from the Premier League at the end of last season they looked at reducing their overheads and terminated our pitch maintenance contract. Within two months the head groundsman called us to ask that we resume our operation as soon as possible as since we had not been carrying out the work the problem had returned.

#### XXXXXXX Embassy

The XXXXXX Ambassador's residence in Kensington Palace Gardens had experienced a lot of damage to the lawn caused by foxes. Foxolutions carried out a similar treatment to that at Charlton Athletic to a very high degree of success. We also treated the areas that had been fouled with the Curb solution and this eradicates the problem.

From our experience we have no doubt that Curb is the best solution available to repel foxes. We carry out sprays for a number of both corporate clients and private residences and our success rate is testament to the efficacy of the product.
